STRUCTURED QUERY LANGUAGE

>SQL (Structured Query Language) is the most common and widespread language/ tool within Business Intelligence systems.

>It is widely used across most vendors, and in the vast majority of popular and powerful BI tools

>SQL is often used by Business Analysts and occasionally by managers. It is not just for Engineers or programmers.

>By having a command of the common, widely used „SELECT" statement, you can explore BI tools and rapidly create interactive or even advanced reports and visualizations.
